

Press Release

Colisée continues its development in France with the acquisition of 12 nursing homes from GDP Vendôme

Paris, April 3rd, 2017 – Colisée continues its external growth policy and announces today the acquisition of 12 nursing homes from the GDP Vendôme Group. This transaction allows Colisée to strengthen its position of one of the benchmark private operators with 89 facilities and close to 7.000 beds.

A high-quality platform

The twelve facilities meet perfectly the selective investment criteria held by Colisée and Eurazeo PME, its shareholder:

- High-quality buildings, recently built and perfectly suited to the residents and their loved ones' needs,
- Committed teams of professionals,
- A solid reputation for quality.

This acquisition allows Colisée to reinforce its capacity with nearly 1.000 beds in France, and to increase its institutional visibility, especially with the public health and local authorities.

A potential for new developments

Furthermore, several sites show potential for extension, and on those Colisée considers building four new service residences. These projects are aimed at providing an alternative solution between living at home and living in a nursing home.

“This acquisition marks a new crucial step in our development and helps strengthening our projects portfolio. With the support of Eurazeo PME, our shareholder, we demonstrate our ability to take an active part in the sector’s consolidation movement and the creation of new accommodation options for elderly people.” states Christine Jeandel, CEO of Colisée.

About Colisée:

Colisée is a key player in the global health care and old-age dependency sector, and has developed a real expertise in elderly people care and well-being. Its network includes 89 facilities in France, Italy and Spain and close to 70 home-based services agencies in France. In those two business segments, Colisée employs more than 6.700 people. Its majority shareholder is Eurazeo PME.
